Career Objective

- Aspiring Data Analyst with hands-on skills in Python, SQL, Power BI, Excel, EDA, and Web Scraping, seeking an entry-level role to transform raw data into actionable insights that drive business decisions.

Technical Skills

- Programming Skills:** Python, EDA, SQL, Power BI, Web Scraping.
- Libraries:** Pandas, Numpy, Matplotlib, Seaborn
- Tools & Databases:** MySQL (RDBMS), Jupyter Notebook, VS Code, MS Excel, Microsoft Power BI

Projects

Library Management System | MySQL

- Built a SQL-based Library Management System to manage books, members, authors, publishers, and borrowing transactions through a structured relational database.
- Utilized advanced SQL concepts such as joins, subqueries, views, aggregate functions, and constraints to support reporting, data integrity, and library operations.

Global Video Game Sales Intelligence Dashboard | EDA with Python, SQL, Power BI

- Cleaned and transformed video game sales data using Exploratory Data Analysis (EDA) with Python and identified sales trends, regional performance, and genre popularity.
- Converted my unstructured cleaned dataset into a video games sales database using MySQL.
- Built an interactive Power BI dashboard featuring KPIs, filters, and dynamic visualizations and generated business insights to support market trend analysis and decision-making.

PhonePe Analysis Dashboard | Power BI

- Developed an interactive Power BI dashboard to analyze PhonePe transaction and user data.
- Cleaned and transformed data using Power Query to create accurate reports.
- Designed dashboards with charts, filters, and KPIs to visualize trends and generate business insights.

Big-Basket Products Analysis | Exploratory Data Analysis (EDA)

- Cleaned and prepared a 27K+ product dataset using Python and Pandas for accurate analysis.
- Performed EDA to study product categories, prices, discounts, brands, customer ratings.
- Created charts and visualizations to identify trends and generate business insights for better decision-making.

Corporate Training:

Data Science with Gen AI | Innomatics Research Labs (Hyderabad)

JULY 2025 – JUN 2026

- Learned data cleaning, preprocessing, and exploratory data analysis (EDA) using Python, SQL, Pandas, and Excel.
- Created interactive dashboards in Power BI to visualize data and business metrics.
- Analyzed real-world datasets using statistics and data visualization to find useful insights.
- Completed hands-on training in Data Science, Machine Learning, and Generative AI using Python and SQL.
- Built machine learning models using Pandas, NumPy, and Scikit-learn after preparing and processing data.

Internships

Microlink Information Technologies - Summer Intern

JUN 2024 - JUN 2024

- Gained hands-on experience in embedded systems using Arduino UNO, Arduino IDE, and Embedded C.
- Designed and developed a prototype by interfacing sensors and actuators with a microcontroller to apply embedded system concepts.

Cisco Networking Academy - Summer Intern (Virtual)

MAY 2023 - JUN 2023

- Completed a 30-day Virtual Networking Internship by Cisco, gaining knowledge of networking fundamentals and network device connectivity.
- Configured routers, IP addressing, and basic routing in Cisco Packet Tracer through hands-on networking exercises.

Education

Sri Sairam Institute of Technology, Chennai

2022 – 2025

B.E – Electronics and Communication Engineering (ECE) | 6.5 CGPA

DVR & Dr. H.S. MIC College of Technology, Kanchikacherla

2019 – 2022

Diploma – Electronics and Communication Engineering (ECE) | 73.94%
